EXPERIENCE

DevOps Engineer | Project Manager

Maedric

Sep. 2025 - Present, Singapore (Remote)

- Manage a **Multicloud** environment across **Linode**, **DigitalOcean**, and **Azure**, maintaining a "**from the ground up**" vision and architecture by self-hosting all core services in-house.
- Developed custom **Bash-based automation** and CI/CD workflows to facilitate **full provider migrations** with less than **one hour** of downtime.
- Handle **server hardening**, routine patching, and end-to-end **SSL/TLS** certificate management across all environments.
- Engineered **GitHub Actions** pipelines; optimized deployment speed by **40%** for Production and UAT.
- Integrated **CodeQL** and AI-assisted reviews to automate security and code quality standards.
- Project Management: Led a team of **4 developers** using AI-driven scoping; managed Git workflows, task delegation, and timeline delivery.

Co-Founder & System Administrator

Casual Crafters

Aug. 2023 - Present, Singapore (Remote)

- Deployed **Nginx reverse proxies** to mask origin IPs and harden infrastructure, achieving **99.7%** uptime.
- Automated** dynamic IP updates and configurations using **Ansible**, transforming a routine **30-minute** manual task into a fully automated workflow.
- Administered Ubuntu servers, executing initial setup, **automated backups**, and routine security patching with zero data loss over **2+ years**.
- Monitored system performance, applied game panel software upgrades, and maintained consistent server uptime.

PROJECT

Secure Self-Hosted Media Server

rhythm1337.github.io/p/self-hosting-google-photos-with-immich-on-rhel-and-podman/

- Deployed containers using **rootless Podman**, configuring custom **SELinux volume** contexts and PostgreSQL database for hardened security.
- Integrated Tailscale for secure, remote network access without exposing public internet ports.

Ansible Dynamic Proxy

github.com/Rhythm1337/ansible-dynamic-proxy

- Developed a lightweight Ansible playbook to automate the deployment and configuration of an NGINX reverse-proxy on a Cloud VM.
- Templated **NGINX stream** and HTTP configurations via **Jinja2**, dynamically fetching public IPs and automatically reloading services upon changes.

EDUCATION

B.Tech CSE Cyber Security

Lakshmi Narain College of Technology & Science (LNCTS) · Bhopal, Madhya Pradesh · Sep. 2024 – Jun. 2028

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals - 2026

Red Hat Certified Specialist in Security: Linux - 2025

Red Hat Certified Specialist in Containers - 2024

Red Hat Certified Engineer - 2024

Red Hat Certified System Administrator - 2023

Red Hat Verify: <https://rhtapps.redhat.com/verify?certId=230-037-392>

SKILLS

Languages & Scripting: Python | Bash | SQL | YAML

Platforms & Infrastructure: Linux (RHEL, Ubuntu) | Azure | DigitalOcean | Nginx | PostgreSQL | Tailscale | Linode | AWS

Containers & Orchestration: Docker | Podman | Kubernetes | OpenShift

DevOps & Automation: Git | GitHub Actions | Ansible | CI/CD | Infrastructure as Code (IaC) | High Availability (HA)

Security & Compliance: SELinux | OpenSCAP | Network Security & Proxying
