Infrastructure engineer specializing in enterprise open source: Linux, automation, containers, and cloud.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) · 2026 · [Verify](#)
Red Hat Certified Specialist in OpenShift Administration (EX280) · 2025 · [Verify](#)
Red Hat Certified Specialist in Security: Linux (EX415) · 2025 · [Verify](#)
Red Hat Certified Specialist in Containers (EX188) · 2024 · [Verify](#)
Red Hat Certified Engineer (RHCE) · 2024 · [Verify](#)
Red Hat Certified System Administrator (RHCSA) · 2023 · [Verify](#)

EXPERIENCE

DevOps Engineer & Technical Lead

Maedric - Jewellery E-commerce Startup Sep. 2025 - Present · Freelance, then Part-time · Singapore (Remote)

- Designed and maintained a multicloud architecture across Linode, DigitalOcean, and Azure, self-hosting all core services to align with cost and reliability goals.
- Developed custom Bash-based automation and CI/CD workflows enabling full provider migrations with less than one hour of downtime.
- Built and optimized GitHub Actions pipelines for Production and UAT environments.
- Engaged directly with the founder to gather requirements, propose technical approaches, and deliver scoped implementations, then coordinated a team of 4 developers through delivery.
- Authored internal infrastructure documentation covering deployment procedures, architecture decisions, and system administration workflows.

Co-Founder & System Administrator

Casual Crafters · Online Gaming Community Aug. 2023 - Present · Part-time, Remote

- Deployed Nginx reverse proxies to mask origin IPs and harden infrastructure, achieving 99.7% uptime.
- Automated dynamic IP updates and configurations using Ansible, transforming a routine 30-minute manual task into a fully automated workflow.
- Administered Ubuntu servers with automated backups and routine security patching; zero data loss over 2+ years.
- Managed a gaming community of 500+ members, handling player support, content moderation, and donation-based monetization.

PROJECTS

Secure Self-Hosted Media Server

rhythmdev.me/p/self-hosting-google-photos-with-immich-on-rhel-and-podman/

- Deployed an open-source media platform (Immich) with rootless Podman, configuring custom SELinux volume contexts and PostgreSQL for hardened security.
- Integrated Tailscale for secure remote access without exposing public internet ports.

Ansible Dynamic Proxy

github.com/Rhythm1337/ansible-dynamic-proxy

- Developed a lightweight Ansible playbook to automate NGINX reverse-proxy deployment and configuration on a Cloud VM.

PUBLICATIONS

- Published technical articles on RHEL, Podman, SELinux, and Ansible automation at rhythmdev.me.
- Produced [video walkthroughs](#) of technical projects covering container security and infrastructure automation.
- Maintain public [study notes](#) across the Red Hat portfolio (OpenShift, Ansible, Security, OpenStack, AI/ML) on GitHub.

SKILLS

Languages & Scripting: Bash (Shell Scripting) | YAML

Platforms & Infrastructure: Linux Administration (Red Hat Enterprise Linux, Ubuntu) | OpenStack | Azure | DigitalOcean | Nginx | PostgreSQL | Tailscale | Linode

Containers & Orchestration: Docker | Podman | Kubernetes | OpenShift

DevOps & Automation: Git | GitHub Actions | Ansible | CI/CD | Infrastructure as Code (IaC)

Security & Compliance: SELinux | OpenSCAP | Network Security | Reverse Proxy & Load Balancing

COMMUNITY & LEADERSHIP

- Organizing Team, Daytona Developers Club Tour '25 (Bhopal) — planned and ran on-ground operations for a developer conference on AI, infrastructure, and open source.
- Team Lead, Smart India Hackathon — led a 6-member team through ideation, prototyping, and final pitch.

EDUCATION

B.Tech in Computer Science & Engineering (Cyber Security)

Sep. 2024 - Jun. 2028

Lakshmi Narain College of Technology & Science (LNCTS) · Bhopal, Madhya Pradesh
